

# Partnering for Efficiency

Excellence in Impregnation, Resin Preparation and Environmental Technologies

**2 IFA Technology**  
Automated weighing, mixing, dosing and conveying of liquids and solids. Leading in the preparation and production of resin.

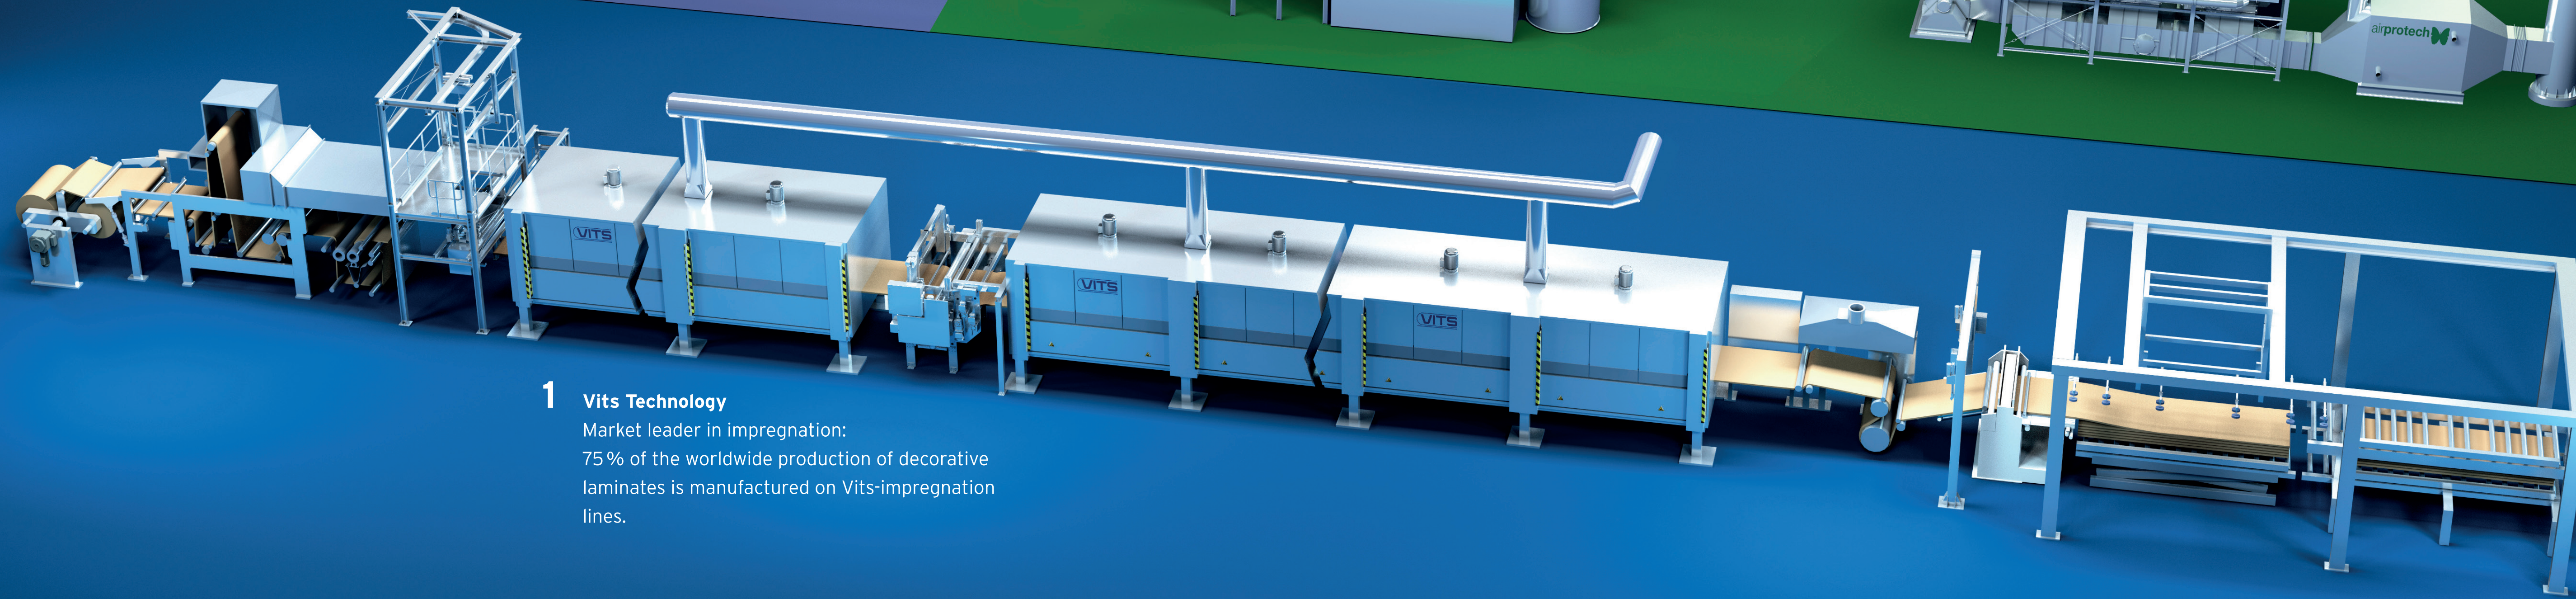

**3 Wessel-Umwelttechnik**  
Turn-key plants for biological and chemical exhaust air purification and energy recovery systems

**5 Eisenmann Environmental Technology**  
Turn-key plants for exhaust air purification, water treatment and waste disposal with material recycling

**4 Airprotech**  
Turn-key plants for polluted exhaust gas through thermal oxidation, catalytic oxidation and rotor-concentration

**1 Vits Technology**  
Market leader in impregnation: 75 % of the worldwide production of decorative laminates is manufactured on Vits-impregnation lines.
