

PROCESS OIL PRODUTCS

PRODUCTS

NYTEX 8120

NYTEX 8120 is a hydrotreated, very low viscosity naphthenic oil, specially designed to minimise the environmental hazard statements tha...

NYTEX 801

NYTEX 801 is a hydrotreated, low viscosity naphthenic oil. It has excellent solvent power, combined with an extremely low pour point, and is VOC...

NYTEX 8022

NYTEX 8022 is a hydrotreated, medium viscosity naphthenic process oil, with low volatility, and very good low temperature properties.

NYTEX 820 EVO

Nynas EVO range is a series of products that exhibit same performance and meets the same specification as our legacy grades bu...

NYTEX 820

NYTEX 820 is a hydrotreated, high viscosity naphthenic oil. It has excellent solvent power, low volatility, and very good low temperature properties.

NYTEX 8150

NYTEX 8150 is a hydrotreated, high viscosity naphthenic oil. It has excellent solvent power, low volatility, and very good low temperature properties.

NYTEX 832

NYTEX 832 is a high viscosity naphthenic oil. It has excellent solvent power, low volatility and very good low temperature properties.

NYTEX 840

NYTEX 840 is a high viscosity naphthenic oil, with excellent solvent power, very low volatility and good low temperature properties.

NYTEX 4700

NYTEX 4700 is a high viscosity Naphthenic Black Oil which exhibits a valuable combination of high solvency and low volatility.

NYFLEX 8120

NYFLEX 8120 is a hydrotreated, low viscosity naphthenic oil, with a high refining degree.

NYFLEX 800

NYFLEX 800 is a low viscosity naphthenic oil, with a high refining degree.

NYFLEX 223 EVO

Nynas EVO range is a series of products that exhibit same performance and meets the same specification as our legacy grades bu...

NYFLEX 223

NYFLEX 223 is a hydrotreated and highly refined, high viscosity naphthenic oil.

NYFLEX 820

NYFLEX 820 is a hydrotreated highly refined, high viscosity naphthenic oil with a light colour.

NYFLEX 3014

NYFLEX 3014 is a hydrotreated and highly refined, low viscosity oil, with a light colour and a low sulphur content.

NYFLEX 3022

NYFLEX 3022 is a hydrotreated and highly refined, medium viscosity oil, with a light colour, and low sulphur content.

NYFLEX 3030

NYFLEX 3030 is a hydrotreated and highly refined, medium viscosity oil, with a light colour, and a low sulphur content.

NYFLEX 3060

NYFLEX 3060 is a hydrotreated and highly refined, medium viscosity oil, with a light colour, and a low sulphur content.

NYFLEX 3100

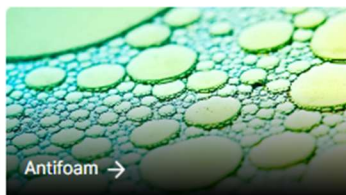

NYFLEX® 3100 is a hydrotreated and highly refined naphthenic oil with high viscosity. It is suitable for a large number of applications, including...

NYFLEX 3120

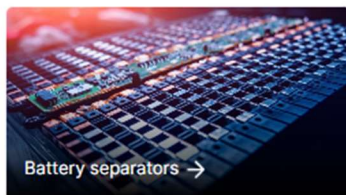

NYFLEX® 3120 is a hydrotreated and highly refined, high viscosity oil, with a light colour, and excellent compatibility with non polar rubber and TPE.
