

Certified Regulatory Professionals Program

The first certified regulatory professionals program starts in the second quarter of 2024. It's organized in collaboration with key academic and professional institutes and lectured by emeritus global regulatory professionals. Successful completion of the program qualifies you as a Certified Regulatory Professional of the RRMA.

Capacity Building & Awareness

Regulatory trainings organized and provided through certificate courses, e-learning courses, webinars, and conferences covering chemical regulations in India, EU, UK, Turkey, South Korea, China, and many more.

Indian Chemical Regulation Helpdesk

An online platform for businesses and regulatory teams to understand chemical, cosmetics, agrochemical, and related regulations in India plus standards like BIS and their obligations.

What is RRMA?

The Regulatory Representatives and Managers Association (RRMA) is a membership-based association that promotes the understanding of chemical compliance and capacity building for industries. RRMA is an organization that represents service providers, and supports industries and businesses to comply with the regulatory requirements, to help them meet global expectations efficiently.

Our Vision

The RRMA envisions a mature and impactful regulatory system of technical regulations on chemicals where India and other developing nations attain high environmental, social, and human health objectives.

Key Objectives and Ongoing Activities
